

Questions for Foxspin

Domain and DNS Control

1. Can we change the nameservers on masterchostaekwondo.com ourselves through the GoDaddy account, or do you need to authorize or unlock that?
2. The domain has these locks enabled. Will any of them block a nameserver change?

clientTransferProhibited
clientUpdateProhibited
clientRenewProhibited
clientDeleteProhibited

3. DNS is currently managed at Register.com, not in GoDaddy. Is there anything we need to do on the Register.com side before switching nameservers away from there?

Hosting and Cancellation

4. If we cancel the website hosting service, does the domain registration stay active? We want to keep the domain and only stop paying for hosting.
5. When hosting is canceled, does it shut off immediately or is there a grace period?
6. Is the hosting and domain registration on separate billing, or bundled together?
7. What is the final paid-through date for the hosting service?
8. Will there be any final invoice, cancellation fee, or prorated charge?
9. Please confirm cancellation only affects Foxspin website/hosting services and does not affect domain registration or DNS access.

Data Export

10. Do you have any of the following we should save before canceling?

Lead form submissions / contact form history
Student or member data
Analytics or tracking data
Website page/content export
Image/media/file export
Any other data tied to our account

Timeline

11. What is the cancellation process? Do we need to give notice in advance?
12. Is there a contract end date or can we cancel anytime?
13. After cancellation, please send written confirmation of:

Final cancellation date
Services canceled
Services left active

Whether any account access will be removed
